

Jin Ming Jian De steel

Surface finish	Description	Application	Cost	Sample Picture
No. 1	Hot rolled , annealed and pickled. Produced by hot rolling followed by annealing and reeling. Generally used in industrial applications, such as for heat or corrosion resistance, where smoothness finish is not of particular importance.	Chemical tank, pipe Pressure vessel etc.	No.1<2B<Hairline<BA<8K (Sometimes according to the size)	
2B	Cold rolled , this is produced as 2D finish, but a final light rolling using highly polished rolls gives the surface a smooth, reflective, grey sheen. This is the most widely used surface finish in use today and forms the basis for most polished and brushed finishes.	Medical equipment, Food industry, Construction material, Kitchen utensils, Water Tank etc.		
BA	Cold rolled , bright annealed and skin-passed, the product has excellent brightness and good reflexivity like mirror, kitchen apparatus, ornaments etc. through the bright heat treatment after cold rolling.	Kitchen utensils, Electrical equipment, Building construction		
Hairline	Cold rolled , polished with abrasive belt of grit #150-#320 on the NO.4 finish and has continuous streaks, mainly used as buildings ornaments, elevators, door of building, frontal plate etc.	Building construction		
8K	Cold rolled , The product has excellent brightness and reflexivity can be the mirror. Based surface is 2B.	Building decoration, Elevator decoration, Industrial decoration, Facilities, etc.
